

PRESS RELEASE

# inspire® Medical Components shown at EWMA 2015

**Coveris Advanced Coatings exhibits at EWMA 2015, 28/05/2015** – Coveris Advanced Coatings recently exhibited at the European Wound Management Association 2015 (EWMA), in London. EWMA is an umbrella organisation linking wound management associations across Europe and a multidisciplinary group bringing together individuals and organisations interested in wound management.

Coveris Advanced Coatings recently exhibited at the European Wound Management Association 2015 (EWMA). The association works to promote the advancement of education and research into native epidemiology, pathology, diagnosis, prevention and management of wounds of all aetiologies.

This was the first time the company had exhibited at EWMA, and it was a great success! In comparison to previous shows the company has attended, such as Medica; EWMA provided a less formal atmosphere. The show also provided a variety of interesting new ideas for the company's range of inspire® medical components. Visitors to the stand were updated on the progress at Coveris Advanced Coatings' sister company based in Matthews, USA, who are busy investing in resources to enable the production of medical films in the USA.

The inspire® range of medical components were shown at EWMA, and are typically used in high performance dressings. The range offers a variety of medical components from ultra-thin polyurethane films and polyurethane foam to innovative medical grade adhesives and conductive films.

Lastly, and not to forget, was Coveris Advanced Coatings' popular prize draw to win a bottle of champagne! If you are interested in discussing Coveris Advanced Coatings' medical products (and perhaps the chance to win a bottle next time) the company has already reserved a stand for the 2016 EWMA show in Bremen, Germany, so make a note in your diary to come and visit us!
